About Mainchain 4.0 (Advance Release)

Mainchain is being upgraded to make your information easier to access and the site easier to use. This Advance Release is an opportunity for you to use the new Mainchain, see what you think and provide feedback /ideas on how well it meets your needs.

It is a work in progress so not everything has been implemented just yet so some areas will look like the old Mainchain – Including FremanWeb, OnIssue and Shipment Centre International. These will be updated shortly.
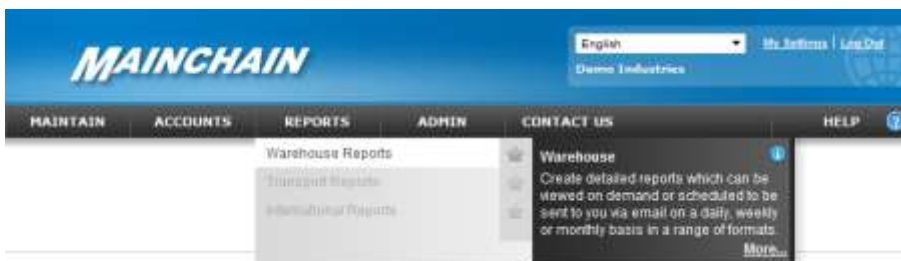

Aside from a new look a few key features of Mainchain 4.0 are:

A Customisable Dashboard

The dashboard provides information for you when you log in such as My Consignments, My International Orders and My House bills. These are configurable sections that can be dragged onto your dashboard and have filters applied. Overtime more will be added, creating even more options for snapshots of information when you login to Mainchain.

Discoverable Functionality

Provide easily to discover information about Mainchain and how you can use it.

Quick Track

Quick track is designed to make it easier to find the latest status of your Consignment, Order or House bill. There is no need to specify the search type; just enter the reference and we will find that latest status across all our systems.

Advanced Search

Advanced search provides more granular options such as search by status, customer, origin and destination.

Feedback

That is just a few of the changes, so have ago and let us know what you think. There is even a feedback form for you to use.

Thanks for participating in the Mainchain Advance Release program.

The Mainchain team
